

AFRICAN SWINE FEVER

African swine fever (ASF) is a highly contagious disease of domestic and wild pigs. There is no vaccine against it. It is not a danger to human health but it can lead to severe economic losses for your production.

Take strict preventative measures on your farm.

Protect your and your neighbours' farms.

Commercial pig farms

Don't be the carrier of a deadly pig disease

RESPECT GENERAL PRECAUTIONS

Declare any suspicious case (dead or alive) to the Veterinary Services

Ensure that all your workers and visitors are aware of biosecurity rules

Clean and disinfect material and equipment coming in or out

Prevent direct or indirect contact with wild boar. Implement quarantine measures for new pigs on farm

Do not feed untreated swill or kitchen scraps containing meat to your pigs
